

THE LAWRENCE SCHOOL ,SANAWAR
Entrance Examination for Class VII

SCIENCE

Time: 01 Hour

Max. Marks: 100

Name (In Capital Letters) _____

Registration Number _____

Centre _____

MARKS OBTAINED

Note: Teacher on duty is requested to ensure that the child has written correct and complete Registration Number

GENERAL INSTRUCTIONS FOR THE CANDIDATE

- 1. All questions are compulsory*
- 2. Questions are to be answered on the question paper itself (on the space provided against each question)*

Name of the Teacher

Signature

Q.1. Identify the property of the material in the following uses: **(1 × 5 = 5)**

- (a) Copper in electric wires _____
- (b) Glass in window panes _____
- (c) Wood in boats _____
- (d) Gold in jewellery _____
- (e) Sponge for cleaning cars _____

Q.2. State whether the following statements are 'True' or 'False'. **(1 × 15 = 15)**

- a) A dry cell can be recharged. _____
- b) All birds are herbivores. _____
- c) We eat the flowers and fruits of the banana plant. _____
- d) Vitamin E deficiency causes Beriberi. _____
- e) Jute is popularly known as golden fibre. _____
- f) Water and milk are immiscible. _____
- g) Muddy water can be cleaned faster by using the method of loading. _____
- h) Souring of milk is a reversible change. _____
- i) Plants can only produce oxygen. They cannot use it. _____
- j) The roots of a plant always grow in the soil. _____
- k) The human skull has all immovable joints. _____
- l) Bats are considered to be arboreal organisms. _____
- m) A type of motion in which a body moves about an axis is called revolution. _____
- n) Attraction is the true test of magnetism. _____
- o) During photosynthesis, plants take oxygen and release carbon dioxide. _____

Q.3. Give one word answers: **(1 × 15 = 15)**

- (a) A type of force that slows down an object. _____
- (b) A device that converts solar energy to electrical energy. _____
- (c) The closed path around which electric current flows. _____

- (d) Temporary magnets made by passing electricity. _____
- (e) Falling of water in any form onto the earth's surface. _____
- (f) The substances that cause pollution. _____
- (g) Tiny pores present on a leaf to exchange gases. _____
- (h) The pattern of arrangement of veins on a leaf lamina. _____
- (i) The process in which birds sit on their eggs to provide warmth. _____
- (j) A device used to close or open an electric circuit. _____
- (k) The long seasonal sleep of animals. _____
- (l) The male reproductive part of a flower. _____
- (m) The property of plant stem to grow towards the source of light. _____
- (n) Deterioration of a material due to interaction with its environment. _____
- (o) Anything that occupies space and has mass. _____

Q.4. Answer the following:

(2 × 20 = 40)

- (a) Both scavengers and decomposers feed on the dead. How are they different?

- (b) Our grandmothers often advise that new born babies should be exposed to sunlight. What is the scientific reason behind this advice?

- (c) Why is the use of jute and cotton bags being encouraged these days?

- (d) Why is it easy to hold a steel tumbler with cold milk than the one with hot milk?
