

Eligibility criteria for solar panel vendors from a project development standpoint:

1. **Experience:** The vendor should have a minimum of five years of experience in the solar panel industry. This experience should include designing, installing, and maintaining solar power systems.
2. **Hilly area experience:** The vendor should have prior experience of working in hilly areas, which can include dealing with difficult terrain, access, and weather conditions that may be unique to these areas.
3. **Reputed institutions/organizations experience:** The vendor should have experience working with reputed institutions or organizations. This can include government agencies, NGOs, or private companies that have a reputation for quality work.
4. **Successful completion of similar projects:** The vendor must have completed similar projects in the past, which can include solar panel installations of more than 50 KW. The vendor should be able to provide references and testimonials from past clients.

Overall, the vendor's experience, successful completion of similar projects, and experience in hilly areas will be critical in ensuring that the solar panel project is completed on time, within budget, and to the required quality standards.
